COMCAM Identified Challenges

- **No formal COMCAM rep with PACOM**
 - MARFORPAC has been tapped to address minor COMCAM issues
 - USAF/USMC Support on aircraft
- **Releasing imagery with Philippines exercises/ops.**
 - Embassy has very tight restrictions and delays imagery.
 - Sub CJIB PAO not staffed, equipped or skilled with reviewing COMCAM imagery
- **Style Guides. DOD vs AP**
 - PAO would not release COMCAM imagery unless AP style was strictly adhered to.
 - Was issue during BK-12. Identified in After Action.
 - Recommend going 100% AP Style
- **Identify proper Job/MOS codes for other service COMCAM**
 - Cobra Gold and Balikatan plans intentionally identified USAF Broadcast to execute COMCAM billets
 - Kadena PAO informally offered billets. Broadcasters filled Cobra Gold Billets. BK-12 was turned off.
 - PAC service components identifying PA for COMCAM billets
 - USARPAC identified and offered PA person with COMCAM experience

COMCAM Identified Successes

- **On-Scene Production ISO BK-12 Task Force**
 - Production skill sets to create files
 - Contracted/procuring civilian material production support.
 - Operational value to on-scene commander
- **Specified COMCAM tasking in Terminal Fury**
 - Initial order had COMCAM specific task outside of PA support. Believe specified tasking from prior ops has taken traction.
 - Specified COMCAM Frago during Terminal Fury
 - Lessons learned prepped but not submitted yet.
- **Validated Universal Needs requirement for image database that can be integrated with C2 networks and systems**
- **Use of DVIDS**
 - Feature mode to autobuild galleries based on key words
 - Automatically forwarding of imagery to DIMOC
- **Workstations compatible with military networks**
 - Opens possibilities of utilizing tactical networks and integrating with C2 structure.
